

Access Unattended Remote Computers

ISL Light for Android

1

Download

ISL Light Android from Google Play.

Available for Free

2

Sign Up / Log In

Create your ISL Online account and start the 15-day free trial.

3 Setup Remote Access & Connect

Open the ISL Light App on your device and log in.

- 1 Select COMPUTERS.
- 2 Tap the "+" button and send access link in an email.
- 3 Run the link on the computer.
- 4 The computer shows up on your remote computers list.
- 5 Decide which remote computer you'd like to access and tap connect button.

4 Control a Remote Desktop

That's it, you can now control a remote computer from your Android device.

- 1 Keyboard
- 2 Right/Left Click
- 3 Zoom/Monitor
- 4 Settings
- 5 Chat
- 6 End Session
